The Arab states of the Gulf, currently heavily reliant on oil and gas exports, have stated their intention to promote economic diversification and have embarked on reforming existing institutions for higher education, scientific research, and technology innovation.

The region has witnessed huge population growth in recent decades, and in some cases (e.g. Saudi Arabia) almost half the population is under the age of twenty-five and in need of access to quality education and meaningful employment opportunities.

This book provides an in-depth discussion of what is needed to accelerate the development of science, technology and innovation in the Gulf. Among other issues, the authors discuss the need for regional collaboration, and tackle systemic challenges such as immigration policies, career incentives for GCC citizens, and increased inclusion of women in the workforce.

Series

Gulf Studies

Key Subjects

Gulf Studies, Middle East Studies
Economics, Politics

Markets

University and Special Libraries, National
Libraries,
Policy-makers, Government Departments
Researchers in the economics of the Middle
East
